Who We Are...

At **EVANSH Services**, we develop innovative and creative products and services that provide total communication and information solutions. Among a plethora of services, web design and development, tailor made applications, CRMs, e-commerce solutions, business-to-business applications, business-to-client applications, digital marketing, managed hosting and internet portal management are few that we offer.

The general purpose of EVANSH SERVICES is to develop and promote advanced information technologies for multi-user operation.

Our business philosophy is to assure the highest quality product, total client satisfaction, timely delivery of solutions and the best quality/price ratio found in the industry.

Our emphasis is on offering a high degree of product user friendliness through a positive, creative and focused company staff.

Vision:

Our Vision is to be a leading Web Solution company in IT sector and progress in our current position in market. We know that Customer's growth is our growth, so we commit our customers to help in achieving their business goals. We believe in work with the accuracy and best quality. We want to be known as the reliable, innovative and user friendly software service provider in IT industry.

Mission:

Exceed client's expectations by going beyond software to provide best Web solutions that transform data into knowledge, enabling them to solve their problems. We believe in enhancing business growth of our customers with creative design, development and to deliver market defining high quality solutions that create value and reliable competitive advantage to customers around the globe.

Company Objectives

In order to achieve our vision and mission, we are following these goals:

- ✓ Standardize and codify key software project concepts and terminology
- ✓ Ensure business goals and objectives are considered at all stages of a project
- ✓ Develop an accurate and flexible model describing key project activities
- ✓ Identify and leverage accurate insights into software project success and failure rates and reasons
- ✓ Identify and encourage best practices which are appropriate for a particular project
- ✓ Develop software/ web application project activity accelerators
- ✓ Develop software/ web application project risk-reducers
- ✓ Encourage a spirit of openness, transparency, integrity, trust, and Continuous learning
 - Iterative Development
 - Service-Based Architecture and Micro services
 - Software Modelling

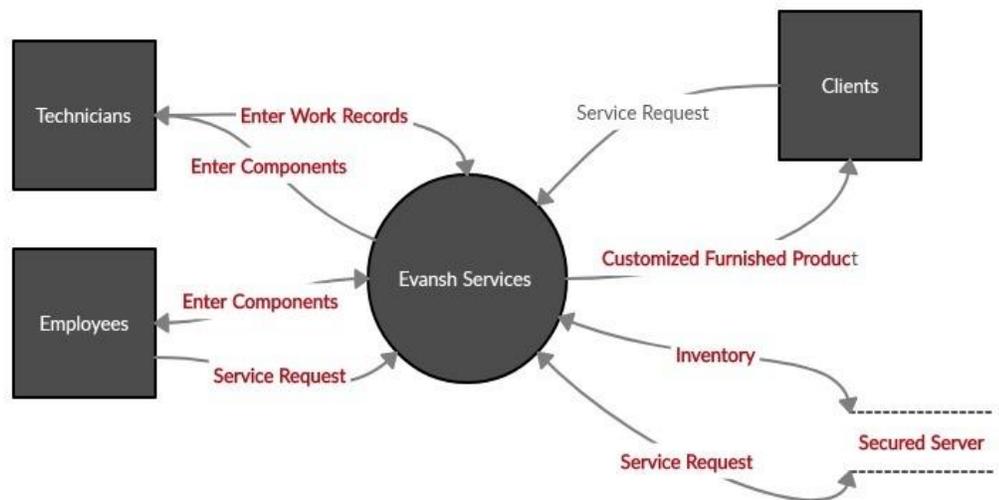

We emphasis on....

Provably and reliably reduce the cost, effort, duration and risk of software/web application projects
